## COMPANY HIGHLIGHTS

GoldsourcE is led by an experienced management team, proven in making exploration discoveries and in project construction. GoldsourcE shares currently trade on the TSX-V under the symbol GXS, in Frankfurt as G5M and in the US as GXSF. Eagle Mountain is an advanced stage gold project in a mining-friendly jurisdiction – Guyana, the only English speaking country of South America. NI 43-101 report (June 15, 2014) resources of 188,000 indicated ounces of gold and 792,000 inferred ounces of gold. Our vision: Become a low-cost Gold producer in Guyana.

**Our Vision: Become a low cost gold producer in Guyana.**  
Production Capacity Target: 4,000 to 5,000 tonnes per day within 2-3 years  
(est. 50,000 – 70,000 oz Au/yr)

## EXPLORATION / DEVELOPMENT

- Immediate focus is on increasing our saprolite resources to a minimum of 550,000-600,000 oz, grading 1.0-1.5 g/t, via expansion and in-fill drilling to sustain a min of 8 years mine before blasting hard rock mineralization.
- Drill to add new gold ounces and upgrade inferred resources into the indicated category in an updated resource estimate (expected Q1 2019). Efficient drilling via two own rigs (core/sonic & diamond).
- New Discovery (Q2 2018) at Salbora (1.5 km NW of the main Eagle Mountain Deposit) and the acquisition of Bishop Growler (3 km NE of EM) (Q1 2018), now indicate a 6.5 km of a gold mineralization corridor/trend.
- High metallurgical Au recoveries (up to 96%) on a standard gravity / cyanidation plant and positive gravity cost-benefit analysis results announced (Q3 2018).
- Approximately a minimum of 45% of mineralized saprolite is minus 200 microns and could bypass the grinding circuit with potential positive benefits in capital and operating costs.
- An NI43-101 compliant Pre-Feasibility Study in progress by Tetra Tech Canada Inc. Delivery in H1 2019.

## OPERATIONS

- A Gravity Concentration Pilot Plant at 1,000 t/d already built in 2015/16 and commissioned
- Open pit mining. Mix of dry (truck-excavator) and wet mining (Marok pumping) techniques tested over a 14 months period.
- The Company currently used the Pilot Plant to collect information for Large Scale Mining and PFS: A) operating costs & testing of different mining methods, B) metallurgical test work.
- Gold ounces sold ease corporate cash calls.

## ABOUT GUYANA

Guyana is one of the most mining friendly countries in the world. The only state in South America with English as its official language, it has a consistently stable economy and political climate. Guyana also has a long history of successful foreign investment in its mining sector, which is supported and protected by British-based law and robust mining laws.

## SHARE STRUCTURE

As of October 25, 2018

Shares issued & outstanding	221,917,910
Options	10,785,000
Warrants	62,891,450
Fully diluted	304,741,632
Market Capitalization	C\$17.7M

## MANAGEMENT | DIRECTORS

**Ioannis (Yannis) Tsitos - M.Sc.,**  
President & Director

**N. Eric Fier - CPG, P.Eng., COO**

**Nicholas Campbell - CFO**

**Bernard Poznanski - Corporate Secretary**

**Graham C. Thody - Chairman,**  
Independent Director

**Haytham Hodaly - Independent Director**

**CAUTIONARY STATEMENT AND DISCLAIMER:** This presentation contains "forward-looking statements" within the meaning of applicable Canadian securities legislation. Such forward-looking statements herein include but are not limited to: strategic plans and expectations in the PEA for the Eagle Mountain Property; metal price assumptions, cash flow forecasts, internal rate of return, projected capital and operating costs; life of mine; and production rates. Such forward-looking statements are based on a number of assumptions, including but not limited to: availability to realize the PEA; accuracy of the interpretations and assumptions used in calculating inferred mineral resource estimates; and timing and amount of capital expenditures and future operating costs. The actual results could differ materially from those anticipated in these forward-looking statements as a result of the risk factors set forth below and elsewhere in this presentation: the availability of funds; results of exploration activities and development of mineral properties; the uncertainties of resource estimations; the timing and content of work programs; project cost overruns or unanticipated costs and expenses; and general market and industry conditions. The assumptions used in the preparation of such statements, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, readers are cautioned not to place undue reliance on these forward-looking statements. The Company undertakes no obligation to update or revise any forward-looking statements included in this presentation, except as otherwise required by applicable law. No securities commission or regulatory authority has reviewed the accuracy or adequacy of the information presented.

**QUALIFIED PERSON:** Technical information contained in this presentation has been prepared by or under the supervision of N. Eric Fier, CPG, P.Eng., and Chief Operating Officer for GoldsourcE, who is a 'Qualified Person' for the purpose of NI 43-101.
