The accompanying notes are an integral part of these condensed consolidated interim financial statements.

1. NATURE AND CONTINUANCE OF OPERATIONS

Goldsource Mines Inc. (the “Company” or “Goldsource”) is incorporated under the jurisdiction of the Province of British Columbia, Canada pursuant to the British Columbia Business Corporations Act. All dollar amounts are expressed in Canadian dollars unless otherwise indicated. The head office and principal address of the Company is 570 Granville Street, Suite 501, Vancouver, BC, Canada, V6C 3P1. The address of the Company’s registered and records office is 19th Floor, 885 West Georgia Street, Vancouver, BC, Canada, V6C 3H4. The Company is listed on the TSX Venture Exchange (“TSX-V”) under the symbol GXS.

The Company is a Canadian resource company engaged in exploration and development. The Company’s primary business objective is to advance its Eagle Mountain Gold Project in Guyana, South America towards initial staged production in 2015. Goldsource’s other mineral interests presently consist of coal exploration properties located in Saskatchewan.

The Company currently has no operations from which to derive revenues, has incurred net losses of \$621,354 for the six month period ended June 30, 2015 (June 30, 2014 – \$494,541), and has an accumulated deficit of \$35.8 million as at June 30, 2015 (December 31, 2014 – \$35.1 million). These condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes the realization of assets and liquidation of liabilities in the normal course of business.

The Company’s ability to continue as a going concern is dependent on the ability of the Company to raise debt or equity financings, and the attainment of profitable operations. In December 2014, the Company completed a private placement for gross proceeds of \$7.1 million. Management believes proceeds from the private placement will be sufficient to fund a significant portion of the development and capital costs for Phase I mine and processing plant construction for the Company’s Eagle Mountain Gold Project as well as general working capital requirements for the next 12 months.

These condensed consolidated interim financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities, or the impact on the statement of operations that might be necessary should the Company be unable to continue as a going concern, and such adjustments could be material.

2. BASIS OF PRESENTATION

Statement of Compliance

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting as issued by the International Accounting Standards Board (“IASB”). These condensed consolidated interim financial statements should be read in conjunction with Goldsource’s consolidated financial statements for the year ended December 31, 2014, which include information necessary or useful to understanding the Company’s business and financial statement presentation. In particular, the Company’s significant accounting policies, use of judgments and estimates were presented in notes 2 and 3, respectively, of these consolidated financial statements, and have been consistently applied in the preparation of these condensed consolidated interim financial statements.

Basis of Preparation

These condensed consolidated interim financial statements have been prepared on a historical cost basis, except for certain financial instruments which are measured at fair value. Additionally, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information. Certain comparative amounts have been re-presented to conform to the current period presentation. These condensed consolidated interim financial statements were authorized for issue by the board of directors of the Company on August 25, 2015.

These condensed consolidated interim financial statements include the accounts of Goldsource and its wholly-owned subsidiaries. Goldsource consolidates subsidiaries where the Company has the ability to exercise control. Control is achieved when the Company has the power to govern the financial and operating policies of the entity. Control is normally achieved through ownership, directly or indirectly, of more than 50 percent of the voting power. Control can also be achieved through power over more than half of the voting rights by virtue of an agreement with other investors or through the exercise of de facto control. All intercompany balances, transactions, income and expenses, and profits or losses have been eliminated on consolidation.

Company	Ownership%	Place of Incorporation	Principal Activity

3. NEW STANDARDS NOT YET ADOPTED

IFRS 9 – Financial instruments (“IFRS 9”)

In July 2014, the IASB issued the final version of IFRS 9 replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on an entity’s business model and the contractual cash flow of the financial asset. Classification is made at the time the financial asset is initially recognized, namely when the entity becomes a party to the contractual provisions of the instrument.

IFRS 9 amends some of the requirements of IFRS 7 Financial Instruments: Disclosures, including added disclosures about investments in equity instruments measured at fair value in other comprehensive income, and guidance on financial liabilities and derecognition of financial instruments. The amended standard is effective for annual periods beginning on or after January 1, 2018, with earlier adoption still permitted.

IAS 16 – Property, Plant and Equipment (“IAS 16”) and IAS 38 – Intangibles (“IAS 38”)

IAS 16 and IAS 38 were issued in May 2014 and prohibit the use of revenue-based depreciation methods for property, plant and equipment and limit the use of revenue-based amortization for intangible assets. These amendments are effective for annual periods beginning on or after January 1, 2016 and are to be applied prospectively.

The Company has not yet completed the process of assessing the impact that IFRS 9, IAS 16 and IAS 38 will have on its condensed consolidated interim financial statements, or whether to early adopt this new requirement.

⁽³⁾ Assets under construction at Eagle Mountain Gold Project are capitalized as “Construction in Progress” and are presented as a separate asset within property, plant and equipment. Construction in Progress includes any costs directly attributable to bringing the assets under construction into working condition for its intended use. The cost of Construction in Progress is currently not depreciated. Depreciation commences once the asset is complete and available for use.

Capital Commitments

In addition to entering into various operational commitments in the normal course of business, the Company has entered into a number of contractual commitments related to design and acquisition of plant and equipment for the Phase I Eagle Mountain Gold Project.

At June 30, 2015, these commitments totalled approximately \$2,345,087 (\$1,811,488 paid) related to the construction of the plant at the Eagle Mountain Gold Project and totalled approximately \$374,332 (\$374,332 paid) related to other contractual agreements for the Eagle Mountain Gold Project. Subsequent to June 30, 2015, the Company entered into additional contractual commitments related to the Eagle Mountain Gold Project totalling approximately \$360,655 (\$248,479 paid), which cumulative amounts to \$3,080,074 (\$2,434,299 paid).

In connection with the acquisition of Eagle Mountain, the Company acquired a 100% interest in the Eagle Mountain Gold Project located in Guyana. On March 6, 2014, the Company executed an Amendment Agreement with Omai Gold Mines Ltd. (“OGML”), a subsidiary of IAMGOLD Corporation with respect to the Eagle Mountain Gold Project in Guyana. The summary of amending terms includes:

- I. Goldsource will issue to OGML 3,389,279 common shares (issued);
- II. Goldsource shall pay OGML, US\$3,025,501 (“Initial Payment”) in cash or, at Goldsource’s option, in common shares of Goldsource, at a price per share equal to a five percent (5%) discount to the Volume Weighted Average Price (“VWAP”) of Goldsource’s common shares for the twenty trading days prior to issuance, upon the earlier of:
 - a. If average market price of gold is US\$1,400/oz. or higher upon achieving total production of 40,000 ounces of gold, then the Initial Payment is due 90 days after 40,000 ounces have been produced, otherwise payment to be made 90 days after 50,000 ounces produced from the Project, or
 - b. Ninety days after having completed one year of gold production under a large scale Mining License issued by the Guyana Geology and Mines Commission (“GGMC”), or
 - c. Five days after the date on which the 20-day VWAP of Goldsource exceeds \$0.75 per share, provided such date is not earlier than March 1, 2015.
- III. Goldsource shall pay OGML, an additional US\$5,000,000 (“Final Payment”) in cash or at Goldsource’s option, US\$2,500,000 cash and US\$2,500,000 in common shares of Goldsource, at a price per share equal to a five percent (5%) discount to the 20-day VWAP of

- a. The payment set out in, (“II a.”) above has been made, or
- b. After having completed one year of gold production under a large scale Mining License issued by the GGMC.

The Company pledged a \$206,825 (US\$194,540) reclamation site bond, in the form of a non-interest bearing bank guaranteed deposit, to the Guyana Geology and Mines Commission for exploration permits on the Eagle Mountain Gold Project.

Goldsource’s subsidiary Stronghold Guyana Inc. (“Stronghold”) holds a prospecting license on the Eagle Mountain Gold Project. In August 2014, the Guyana Geology and Mines Commission granted a Medium Scale Mining Permit (the “Permit”) to Kilroy Mining Inc. (“Kilroy”) to mine gold, diamonds, precious metals and minerals on a portion within Eagle Mountain Gold Project. As the Permit is required under Guyana law to be held by a Guyanese national, Stronghold has entered into agreements with Kilroy, a private arm’s length Guyanese company pursuant to which Stronghold and Kilroy will jointly operate the Eagle Mountain Gold Project. Kilroy has granted Stronghold the exclusive right to conduct mining operations on the Eagle Mountain Gold Project including any additional areas acquired by Kilroy. Stronghold will fund all expenditures on the Eagle Mountain Gold Project and receive 100% of all revenues, subject to applicable government royalties and a 2% net smelter return royalty to Kilroy as compensation for its participation. As part of the agreements, Goldsource issued Kilroy 250,000 common shares of the Company, subject to a 12-month hold period.

7. RELATED PARTY TRANSACTIONS

During the six months ended June 30, 2015, the Company entered into the following transactions with related parties:

Legal Fees

Legal fees of \$17,017 (June 30, 2014 – \$58,947), which were included in professional fees, \$nil (June 30, 2014 – \$26,618) for share issuance costs and \$nil (June 30, 2014 – \$92,580) for transaction costs, were paid or accrued to Koffman Kalef LLP, a law firm of which an officer of the Company is a partner, of which \$1,608 (December 31, 2014 – \$61,087) was payable at June 30, 2015. The Company recognized \$2,230 (June 30, 2014 – \$2,273) in share-based payments to this officer.

Stock Options

The Company has a rolling stock option plan under which it is authorized to grant stock options to executive officers and directors, employees and consultants, enabling them to acquire up to 10% of the issued and outstanding common stock of the Company. The exercise price of each option equals the market price of the Company's stock as calculated on the date of the grant. The options can be granted for a maximum term of 10 years, and certain options to employees and consultants vest over periods of time, determined by the board of directors. Options granted to investor relations consultants shall vest over a period of at least 1 year. The Company has not granted options for periods exceeding 5 years.

In February 2015, the Company granted stock options to directors, officers, employees and consultants to purchase an aggregate of 3,140,000 common shares of the Company at an exercise price of \$0.20 per share for a five year term expiring February 16, 2020. The options are subject to an 18-month vesting schedule pursuant to which 25% vested as of the date of grant and a further 25% shall vest every 6 months thereafter until fully vested.

9. **FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENTS**

The Company's financial instruments consist of cash and cash equivalents, amounts receivable, held-for-trading securities, deposit and accounts payable and accrued liabilities. The carrying value of amounts receivable, accounts payable and accrued liabilities approximate their fair values due to the short periods until settlement.

The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability (for example, interest rate and yield curves observable at commonly quoted intervals, forward pricing curves used to value currency and commodity contracts and volatility measurements used to value option contracts), or inputs that are derived principally from or corroborated by observable market data or other means. Level 3 inputs are unobservable (supported by little or no market activity). The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. The Company's cash and cash equivalents and held-for-trading securities are measured using level 1 inputs.
