

**Bishop Growler - Historical Geological Data
Auger/Trenching/Drilling Program Planned for Q2 2018**

Notes:

- All Bishop Growler's surrounding area belongs to Goldsource's Eagle Mountain Prospecting License (PL).
- Historical surface geology, partly & locally inaccurate, derived from limited regional and very old geological mapping and aero-photography. Area never been drilled.
- Mainly jungle, cutting of new roads in progress.
- Current exploration work (Q2 2018) includes (commenced on March 30th):
 - Geological Mapping, Auger Drilling Lines with holes at 50m spacing
 - Long Trenching Lines with sampling at 10m spacing
 - Saprolite Core Drilling at selected areas
 - Geochemical Sampling of existing gravity tailings storage areas.
